

Paul Klemstine

AI - FIRST SOFTWARE ENGINEER

paulklemstine@gmail.com · 920-358-0890 · Appleton, WI · paulklemstine.web.app · github.com/paulklemstine

I take AI from idea to production system. Ten-plus years, one arc owned end to end — embedded silicon, mobile, cloud, and autonomous AI. Proof over promises: every system on this page is live.

7 / shipped SYSTEMS BUILT, LIVE TODAY	5,052+ THEOREMS MACHINE-CHECKED · LEAN 4	4 / one arc EMBEDDED → MOBILE → CLOUD → AI
---	--	--

PROOF THROUGH DEMONSTRATION · THE LIVE SYSTEMS

Alethean Research	Autonomous logic engine — 5,052+ theorems discovered, formalized, and machine-checked in Lean 4, zero shortcuts.	alethean.org
Tyrant AI	Autonomous agent planning, routing, and fighting a classic roguelike — live in your browser, reasoning streamed.	tyrantai.web.app
Geems	Choose-your-own-adventure secretly powered by an AI psychology engine; the journey compiles into a wellness report.	geems.web.app
Flow Space	Real-time collaborative canvas with AI content generation built natively in.	flowspace.web.app
L.O.V.E.	Autonomous generative agent publishing original uplifting prose to Bluesky, on its own schedule.	@e-v-l-o-v-e
Pythagorean Cosmos	5,052+ machine-verified theorems forming one formal chain across number theory, quantum computing, and physics.	pythagoreancosmos.web.app
Appleton Makerspace	Cofounder & two-term president — led a community workshop into a registered nonprofit.	appletonmakerspace.org

EXPERIENCE · THE ARC

Autonomous systems & formal verification Alethean Research · Pythagorean Cosmos · Tyrant AI — Built an autonomous logic engine that discovers and proves theorems in Lean 4 — 5,000+ machine-checked proofs, zero sorrys — Shipped autonomous agents that plan, learn, and run live in the browser	LIVE NOW
Startups & platforms Dodl.es · CTO & Senior Software Engineer — Technical lead for a large-scale social platform (Java, Android, iOS, JavaScript); owned AWS, CI/CD, Docker, and production end to end — Recruited, hired, and mentored a three-engineer team; mobile apps shipped to both stores	2016 - 2019
Consulting & applied engineering ZyQuest · Schneider National — Real-time Android app using deep neural networks to identify plants and animals from a live camera — Modernized an online custom door configurator for a national manufacturer	2017 - 2018
Embedded & computer vision LIVEALITY — Built embedded Linux imaging devices and internet-connected motion-tracking camera systems — Invented a computer-vision algorithm letting a stationary camera emulate dynamic pan-and-zoom tracking	2013 - 2016
Community & leadership Appleton Makerspace — Cofounded the space and led its transition into a registered nonprofit; secured permanent facilities; organized weekly workshops	2012 - 2014
Service In-home caregiving — Personal care, financial tracking, and property upkeep for a visually impaired individual — a chapter of service between engineering roles	2022 - 2024

TECHNICAL SKILLS

LANGUAGES	Python, Java, JavaScript / TypeScript, Lean 4, HTML/CSS, OpenSCAD, Embedded Linux	AI / ML	LLM research agents & autonomous systems, PyTorch, Hugging Face, TensorFlow Lite, automated theorem proving, computer vision
INFRASTRUCTURE	AWS, Docker, CI/CD (GitHub Actions), real-time collaboration systems, WebAssembly	HARDWARE	3D printing, parametric modeling, embedded devices, makerspace leadership
